PROJECTS

ORA

Ora is a comprehensive event management platform that allows users to create and customize events, invite friends, and choose from free and paid hosting options with unique QR code tickets for attendees.

CHEFTASTIC 2.0

A full stack cross platform mobile application built in React Native and Node JS. It is an UGC based application to let users post and rate recipes along with many other features and secured content.
Check the project on Github

CHEFTASTIC

A native android mobile application to let users see recipes from over 1000 recipes and beverages. It uses Room DB to let users save their favourite recipes and basket.
Download this app from Google Play Store
